DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 13 and 15, Group I, drawn to a method of generating alert for notifying a network condition, classified in class 709, subclass 223.
- II. Claims 12, 14 and 16, Group II, drawn to a method of processing an audio command, classified in class 704, subclass 200.

1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as processing an audio command to derive command data; this is a patentable distinct feature not found in invention I. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and search for Groups II is not required for Group I, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

5. A shortened statutory period for reply to this Election/Restrictions action is set to expire ONE MONTH from the mailing date of this action. The examiner can normally be reached on 8 AM TO 5:30 PM Monday to Thursday and every other Friday.
